

TABLE OF CONTENTS

My story (and why you need this book)	11
Elite performance – what does it really take?	15
The 80 – 20 rule.....	16
Some perspective: performance \neq velocity	17
The four pillars of performance	18
Optimizing your physiology for max velocity	24
Why training works	25
The need for individualization.....	28
Velocity training is about power production.....	30
Understanding the force vs. velocity relationship.....	31
Defining terms.....	32
Additional considerations: training specificity.....	39
A tri-planar approach.....	44
Integrating power into your delivery	47
The importance of lean body mass	52
Lean body mass data: high school to MLB	53
Case study: body composition vs. velocity.....	55
The hard-gainer problem	57
Classifying body types	59
What is genetically possible?	61
Average body statistics of professional pitchers	65
lean body mass guidelines and target bodyweights.....	67
Fueling for growth: the nutritional hierarchy of importance	74
Priority #1: calories.....	76
Priority #2: macronutrients and fiber	85
Priority #3: micronutrients and water.....	97
Priority #4: meal frequency & timing.....	100
Priority #5: supplements	105

Tools for implementing the nutritional pyramid.....	108
Additional recovery modalities.....	111
Sleep	111
Soft tissue work.....	114
Sample daily checklist.....	119
Building an effective training program	120
Balancing volume, intensity and frequency	120
Progression / overload.....	126
Individual differences and auto-regulation.....	127
Exercise Selection	128
Organizing your training cycles.....	139
Final considerations	151
Closing thoughts.....	155
Individualized performance coaching	158
